

# MEDICAL TRANSPORTATION SERVICES

## MUNICIPAL 911

Cataldo Ambulance Service partners with municipalities to provide around-the-clock emergency 911 coverage to communities across Massachusetts as the states largest private EMS provider. Cataldo operates Basic and Advanced Life Support ambulances with highly trained EMTs and Paramedics as well as multiple state of the art dispatch centers.

## NON-EMERGENCY TRANSPORTATION

Cataldo Ambulance Service offers medically necessary non-emergency ambulances and wheelchair van transportation services for facilities and patients. These services can be utilized for transportation to and from medical appointments or in between facilities.

## SPECIAL EVENTS

Cataldo Ambulance offers ambulance services to large-scale special events, sports facilities and other venues. We provide short-term contracts for one-time or annual events, including standby ambulance service and first aid. We also offer long-term contracts for larger venues with multiple events throughout the year.

As part of these services, Cataldo provides exclusive standby services to the TD Garden, Fenway Park, and Warrior Arena to name a few.

- Mobile simulation lab
- SimMan® and SimBaby™ simulator manikins
- Instructor cadre of active EMS practitioners

SmartCare is a highly effective patient management program that utilizes EMTs and Paramedics to care for patients in the out-of-hospital setting. SmartCare clinicians undergo advanced training in several specialty diagnostic and treatment options that can better serve patients and prevent unnecessary ER trips. In the current 911 system, an ambulance response typically results in transport to the hospital. With a SmartCare response, our clinical experts will assess and engage with medical oversight to determine the best treatment option for the patient. In most cases, this results in comprehensive treatment and the ability to safely keep the patient on site or in their homes. SmartCare clinicians service patients in the home, skilled and long-term nursing, and assisted living setting.
